

# CLAY MINERALS

*Journal of Fine Particle Science*

VOLUME 49, NUMBER 2, APRIL 2014

## CONTENTS

C. V. Jeans and N. J. Tosca. Introduction: 7 <sup>th</sup> Cambridge Diagenesis Conference 2011	125
M. J. Wilson and L. Wilson. Clay mineralogy and shale instability: an alternative conceptual analysis	127
M. J. Wilson, L. Wilson and I. Patey. The influence of individual clay minerals on formation damage of reservoir sandstones: a critical review with some new insights	147
N. J. Tosca and A. L. Masterson. Chemical controls on incipient Mg-silicate crystallization at 25°C: Implications for early and late diagenesis	165
E. Kuznetsova and R. Motenko. Weathering of volcanic ash in the cryogenic zone of Kamchatka, eastern Russia	195
K. G. Taylor and J. H. S. Macquaker. Diagenetic alterations in a silt- and clay-rich mudstone succession: an example from the Upper Cretaceous Mancos Shale of Utah, USA	213
M. Wilkinson, R. S. Haszeldine and A. E. Fallick. Authigenic illite within northern and central North Sea oilfield sandstones: evidence for post-growth alteration	229
N. Clauer, M. Honty, A. E. Fallick, V. Šucha and A. Aubert. Regional illitization in bentonite beds from the East Slovak Basin based on isotopic characteristics (K-Ar, $\delta^{18}\text{O}$ and $\delta\text{D}$ ) of illite-type nanoparticles	247
X. F. Hu, D. Long and C. V. Jeans. A novel approach to the study of the development of the Chalk's smectite assemblage	277
C. V. Jeans, N. J. Tosca, X. F. Hu and S. Boreham. Clay mineral-grain size-calcite cement relationships in the Upper Cretaceous Chalk, UK: a preliminary investigation	299
D. S. Wray and C. V. Jeans. Chemostratigraphy and provenance of clays and other non-carbonate minerals in chalks of Campanian age (Upper Cretaceous) from Sussex, southern England	327
