

# CLAY MINERALS

*Journal of Fine Particle Science*

VOLUME 51, NUMBER 2, May 2016

## CONTENTS

M. van Geet and R. Dohrmann. Overview of the clay-mineralogy studies presented at the 'Clays in natural and engineered barriers for radioactive waste confinement' meeting, Brussels, March 2015	125
Sirpa Kumpulainen, Leena Kiviranta and Petri Korkeakoski. Long-term effects of an iron heater and Äspö groundwater on smectite clays: Chemical and hydromechanical results from the <i>in situ</i> alternative buffer material (ABM) test package 2	129
R. Gómez-Espina and M.V. Villar. Time evolution of MX-80 bentonite geochemistry under thermo-hydraulic gradients	145
Takamitsu Ishidera, Seiichi Kurosawa, Masanori Hayashi, Keiji Uchikoshi and Hikari Beppu. Diffusion and retention behaviour of Cs in illite-added compacted montmorillonite	161
Joonas Järvinen, Michał Matuszewicz and Aku Itälä. Methodology for studying the composition of non-interlamellar pore water in compacted bentonite	173
M. Matuszewicz, V.-M. Pulkkanen and M. Olin. Influence of sample preparation on MX-80 bentonite microstructure	189
Anniina Seppälä, Eini Puhakka and Markus Olin. Effect of layer charge on the crystalline swelling of Na <sup>+</sup> , K <sup>+</sup> and Ca <sup>2+</sup> montmorillonites: DFT and molecular dynamics studies	197
Natalia Mayordomo, Claude Degueldre, Ursula Alonso and Tiziana Missana. Size distribution of FEBEX bentonite colloids upon fast disaggregation in low-ionic strength water	213
Raúl Fernández, Ana Isabel Ruiz and Jaime Cuevas. Formation of C-A-S-H phases from the interaction between concrete or cement and bentonite	223
Chen Bao, Guo Jiaying and Zhang Huixin. Alteration of compacted GMZ bentonite by infiltration of alkaline solution	237
Daniel Daniel, Paul Wersin, Jocelyne Brendlé, Joffrey Huve, Leena Kiviranta and Margit Snellman. Interaction of titanium with smectite within the scope of a spent fuel repository: A spectroscopic approach	249
Takuma Sawaguchi, Manabu Tsukada, Tetsuji Yamaguchi and Masayuki Mukai. Effects of OH <sup>-</sup> activity and temperature on the dissolution rate of compacted montmorillonite under highly alkaline conditions	267
Tetsuji Yamaguchi, Takuma Sawaguchi, Manabu Tsukada, Seiichi Hoshino and Tadao Tanaka. Mineralogical changes and associated decrease in tritiated water diffusivity after alteration of cement–bentonite interfaces	279
S. Kaufhold and R. Dohrmann. Distinguishing between more and less suitable bentonites for storage of high-level radioactive waste	289
